cloudera®

as a service

phData

Faster Time-to-Value from the Industry's Most Experienced Hadoop Team.

phData is the first and only managed service provider dedicated to Hadoop and its ecosystem.

phData's leadership and expertise enables us to provide skilled guidance to Fortune 500 companies as they build and operate Big Data applications, analytics and infrastructure. We specialize in developing, implementing and maintaining turnkey, comprehensive Cloudera solutions.

Proven Success

Financial Services Institution reduced capital reporting time from *6 hours* to *20 minutes*

Apparel Manufacturer *reduced initial operations costs by 85%* and acquired new capabilities that drive business

Packaged Goods Manufacturer reduced a *3-month* process to *2 days*

Cloudera as a Service

analytics

Tackle your organization's most challenging analytical problems.

applications

Operationalize Hadoop and bring your Hadoop-driven application into production.

infrastructure

Deploy, develop and adopt Hadoop and its supporting technologies.

Hadoop Expert Administration (Fixed Price)
Provides base support for all Hadoop nodes masters and slaves

Hadoop Expert Administration (Hourly)
Provides support for services beyond base Hadoop Management

Strategic, Integrated Solutions

Our engineers provide customized solutions for everything from architectural design through operational decisions.

The strategic guidance we provide enables global businesses to take full advantage of Big Data managed services in the future.

- ✔ Fully managed Hadoop clusters with 24x7 support

- ✔ On-premise, Cloud and Hybrid solutions

- ✔ Worldwide coverage with in-depth knowledge

- ✔ Supported by the world's leading Spark development team

- ✔ phData helps you achieve optimal operations, reliability and scalability with zero-touch EDH and Hadoop management.

Focused on Results

Faster Time-to-Value — Your Greatest Advantage

- ✔ Expert engineering and application development dramatically reduces ramp-up time

- ✔ We provide your team with the knowledge and skills to troubleshoot

- ✔ Reduced business risk due to iterative methods, continuous client feedback and best practices

- ✔ Enhanced productivity for your IT teams

- ✔ Increased accessibility to data and new insights

- ✔ Cloud cost optimization that saves up to 20% on infrastructure

Managing Complexity for Success

phData knows the intricacies of Big Data projects and how to expedite them for organizations. Our expertise translates into successful implementations and management, which reduces your business risk, *increases accessibility to data and empowers better decision making.*

Position your Big Data projects for success today.
