

Build Smarter, Ship *Faster* with Cortex Code

Accelerate data & app development with agentic engineering on Snowflake. With phData-led, half-day workshop built around your team's actual backlog we work through **the friction and make it the lab focus.**

Ready to accelerate dev times with Cortex Code?

- ½ Day** hands-on session
- 5+** use case tracks
- 100%** client backlog focused

[Talk to a Cortex Expert](#)

visit us at phdata.io

01 THE AGENDA

- ✓ Agentic Development: Introduction (30 min)
- ✓ Exercise 1: Cortex Code Basics (30 min)
- ✓ Break / Development Time (60 min)
- ✓ Exercise 2: Specialized / Custom Lab (120 min)
- ✓ Show & Tell (20 min)
- ✓ Wrap / Q&A (10 min)

02 BRING YOUR OWN BACKLOG

This Is Not a Canned Demo.
Let's work on actual blockers. Here are a few ideas:

- SQL Server to Snowflake Migrations
- Steamlit Applications Creation
- Semantic Model Curation
- Talk to Your Data Applications
- Data Modeling Agents
- Agentic Workflows
- Choose your own focus!

OUTCOMES

- Faster Code Velocity
- Relevance to Actual Work
- Clear Path to Production
- Cortex Code Confidence
- Skill Artifacts & Next Steps

03 WHO SHOULD ATTEND

Discover the Power of Cortex Code.

These labs are ideal for anyone interested in developing data products and assets with agents! Data architects, engineers, and business domain experts looking for the art of the possible with Cortex Code. Data experience is optional, but helpful for certain lab sections. Executive attendance encouraged for show & tells.

04 CLIENT READINESS

Pre-lab Checklist

- Cortex Code enabled in your Snowflake account
- Individual schemas provisioned per participant
- Role configured for hands-on-lab participants
- Warehouse set up and assigned to the HOL role
- Database setup for sandbox use
- [Cortex Code CLI](#) installed on machines
