

SNOWFLAKE CORTEX AGENTS ACCELERATOR | POWERED BY PHDATA FORGE

Build Cortex Agents fast. Operate them right. Enhance Snowflake Cowork.

Five agents. Five weeks. Built for production with the controls enterprise teams actually need.

AGENTS DEPLOYED

Up to **5**

DURATION

5 weeks

FIXED PRICE

\$50K

phData's Snowflake Cortex Agents Accelerator helps Snowflake customers move from experimentation to operationalization fast. Using phData Forge skills, we deploy up to five purpose-specific agents in five weeks to get more from your Snowflake Cowork experience.

We back them with the rigorous backend controls enterprise teams actually need: observability, FinOps, golden evaluation datasets, governance, and a team equipped with the skills to keep building.

The result is speed, self-sufficiency, and zero operational debt.

01 DELIVERABLES

WHAT WE DEPLOY

An AI-native toolkit for deploying and managing backend agents, powered by Cortex Code.

➤ Up to 5 Cortex Agents

Business-aligned agents deployed on the Snowflake Cortex backend, scoped to high-value use cases to instantly add intelligence to your Cowork front end.

➤ Skills-First Deployment Framework

Cortex Code-based deployment that reduces bespoke engineering and one-off code.

➤ Workforce Enablement

We hand off our knowledge and Cortex Code skills (from phData Forge) required to maintain and scale your agents.

➤ Observability, Governance & FinOps

Cost controls, audit trails, and quality monitoring designed for enterprise from day one.

02 ROADMAP

KICKOFF TO HANDOFF IN FIVE WEEKS

03 BENEFITS

PRODUCTION-GRADE AI, WITH OPERATIONAL CONFIDENCE.

We close the gap between a working demo and a durable deployment by combining backend agentic development with repeatable evaluation, semantic rigor, and post-launch operational capability with the know-how to scale.

- ✔ Evaluation routines to test quality and catch regressions
- ✔ Enablement, institutional know-how, and runbooks
- ✔ AI-native agentic workflows and phData Forge skill libraries tailored to your team's Snowflake Cowork workflows

RESULTS

- Faster time-to-value
- Higher confidence in model outputs
- Lower rework & regression
- Repeatable path to scale
- Self-sufficiency & institutional knowledge

Increase the power of Snowflake Cowork with purpose-built Cortex Agents.

FIVE AGENTS. FIVE WEEKS. BUILT FOR PRODUCTION.
